

CRIMSON ENERGY STORAGE PROJECT

Recurrent Energy is developing the Crimson Energy Storage Project, a 350 MWac large-scale battery storage facility in Riverside County, California near Palm Springs. The interconnection point will be located 35 miles southeast at an electrical substation by Blythe, California. This project also has a 200 MW energy storage contract with Southern California Edison (SCE) that will provide critical grid reliability services starting in 2022. The Crimson Energy Storage Project is expected to be fully operational in 2023.

Long-Term Benefits for Riverside County

LOCAL JOBS

The Crimson Energy Storage Project will create up to 450 jobs during peak construction. Expanded local power capabilities can also help attract better jobs — especially high-tech jobs — to Riverside County.

TAX REVENUE

Once operational, this energy storage project will generate \$19 million of long-term revenue to Riverside County. These revenues can be used to fund local government services, schools, road upgrades and other municipal infrastructure improvements annually.

COMMUNITY COMMITMENT

We recognize our projects have a long-term presence in the communities where they are sited, and we seek to foster a long-term community partnership to create a lasting, positive impact. The Crimson Energy Storage Project is committed to supporting local community organizations in Riverside County through donations and sponsorships.

ABOUT RECURRENT ENERGY

Recurrent Energy is a leading utility-scale solar developer with projects across the United States. Since 2006, Recurrent Energy has completed over 70 projects, and the total energy from our completed projects powers roughly 300,000 homes annually with low-cost clean electricity. During this time, we've partnered with industry leaders, including Google, GE Energy, Southern Power, Duke Energy, Dominion Energy, U.S. Bank, Bank of America, KeyBank, and others, and we are equally committed to partnering with our host communities and organizations. We know from firsthand experience that it is essential to be an active part of the communities in which we work. We strive to build trust, credibility and support by working in close coordination with local organizations, schools and community members through every step of project development, construction, and operations.
